

Engineering applications of HOEs manufactured with enhanced performance DCG films

High spatial resolution measurement of volume holographic gratings

Holograms in acrylic copolymer adhesive

Transparent acrylic enamel slide holograms

Managing and directing innovation in the holography business

Intellectual property analysis of holographic materials business

Intellectual property licensing issues in the holography business

Intellectual property analysis of embossed hologram business

Bronze rainbow hologram mirrors

Physical aspects of digital synthesis and reconstruction of the multiview diffractive images

Optimal design and evaluation of a color separation grating using rigorous coupled wave analysis

Recording and reconstruction of 3D color images by phase-shifting in-line holography

3D display with wide viewing zone using holograms with reduced information

Advances with holographic DESA emulsions

Lactose holograms

Polymerization-induced diffusion as a tool to generate periodic relief structures : a combinatorial study

Pineapple holograms

The recent holographic material : Konica P7000

An application of polymer holographic grating with the frustrated-total-internal-reflection coupling structure to wavelength-band selection for optical wireless communication

A PMMA-metal lamella grating based surface plasmon resonance device

A ulexite-based animation recording system by random reference patterns

Impact measurements using double pulse digital holography

3D CGH registration on organic and non-organic resists : comparative analysis

Applications of the high-resolution optical reconstruction of digital holograms

Real time calculation for holographic video display

Holographic stereogram using graphic accelerator

Reconstruction of color images of high quality by a holographic display

Hologram technology in the display field

Electro-holography system using an array of water particle 3D screen

Photoinduced birefringence and cooperative molecular reorientation in azo copolymer : optical characterization for rewritable memory application

Optical characteristics of holographic input-beam coupler using a photopolymer

Stability of holographic gratings recorded on photopolymer using different dyes

Real-time holographic gratings recorded in norland optical adhesive 65 and crystal violet dye

Properties comparison of holograms using PVA doped with $MgCl_2$ as conductor polymer

Holograms using PVA doped with $CoCl_2$ as conductor polymer

Epoxy resin holograms

Successive encryption and transmission with phase-shifting digital holography

A high-resolution fringe printer for studying synthetic holograms

Data compression for transmission of holographic 3D images using digital SSTV

Development of interactive tabletop hologram

Color evaluation of full color hologram
