

Application of liquid crystal polymer films for photolithographic fabrication of 3D structures

Dichromated gelatin holograms with triphenyl dyes

Dichromated polyvinyl alcohol films doped with organic colorants

Optical properties of composite organic conductive films by holographic storage

Diffraction efficiency study of holographic gratings in dichromated poly(vinyl alcohol) $\text{NiCl}_2 \cdot 6\text{H}_2\text{O}$ doped

New trends on photopolymers

Crystal beginnings II: the mind map of holography

Fabrication of ultra-fine-grain silver halide recording material for color holography

Multiplexing volume holographic gratings for a spectral-spatial Imaging system

Propagation vector analysis of digital holography and its application for three-dimensional angle measurement

Broadband diffuser for an IR illumination system

Research of the file system of volume holographic storage based on virtual storage layer

Progress in holographic video displays based on guided-wave acousto-optic devices

Horizontal resolution enhanced hologram to increase horizontal viewing angle

Luminous presence

Effects of nonlinear characteristics of LCD panel on image reconstruction in electro-holography

Electronic generation of holograms by using depth maps of real scenes

High-density recording of full-color full-parallax holographic stereogram

A method to increase the hologram viewing angle by the beam reconfiguration

Capabilities of diffractive optical elements for real-time holographic displays

Half-zone-plate processing for objects on both sides of hologram display

Development of a fully functioning digital hologram system

Large holographic displays for real-time applications

One-shot digital holography for recording color 3D images

Development of a simple user-friendly commercial digital holographic microscope

Volume holograms in polyvinyl alcohol with $\text{CuCl}_2 \cdot 2\text{H}_2\text{O}$

Hydrophobic sugar holograms

Voltage effect in holographic gratings by organic conductive materials

Holograms with corn honey and erioglaucine dye

Holograms in thermoplastic nail varnish

Holograms with egg albumin

Multiplexing holograms for data page storage as a holographic memory in a PVA/AA photopolymer

Secure holographic storage using single phase encoding

Real-time interferometric characterization of a PVA based photopolymer

Quality evaluation of Lippmann-type hologram using CGH

Theoretical model of the diffraction efficiency of Norland Optical Adhesive No. 65 and crystal violet as temperature function

Enlargement of visual field with an LCD in computer generated holograms

Digital holographic interference analysis using a 2-step phase-shifting technique

Computer-generated cylindrical rainbow hologram

Large viewing angle projection type electro-holography using new type mist 3-D screen

Efficient generation of CGH for video images using LUT method

Reconstruction of digital hologram generated by sub-image of integral imaging

Phase modulation in holographic gratings recorder in Norland 65

Fourier holograms in Norland 65
